

DAVID BYRNE SILVIA, JR.

Salt Lake City, UT | 401-480-0799 | davidsilvia45@gmail.com | [linkedin.com/in/david-silvia-jr/](https://www.linkedin.com/in/david-silvia-jr/)

Product-focused business professional with 3 years of experience across SaaS, startup growth, resort operations, and emergency management. Skilled in translating customer research, operational needs, and data-driven insights into product requirements and technology-enabled solutions. Experienced in product discovery, cross-functional leadership, and stakeholder alignment, with a track record of solving ambiguous problems in fast-paced environments.

EDUCATION

University of Utah — David Eccles School of Business <i>Master of Business Administration</i> <i>Master of Science, Information Systems</i>	Expected May 2028
University of Utah <i>Bachelor of Science, Finance</i>	August 2023

TECHNICAL SKILLS

Programming & Web Development: Python, SQL, R (dplyr, ggplot2, RMarkdown), TypeScript, React, HTML, Streamlit
Artificial Intelligence: AWS Bedrock, Converse API, Bedrock Guardrails, structured JSON outputs, AI-assisted product development
Data Analytics & Visualization: Tableau, Power BI, Microsoft Excel, data modeling, business intelligence, data visualization
Systems & Databases: Systems analysis and design, database management, data governance, enterprise systems, cloud computing fundamentals
Product Development: Requirements gathering, business process analysis, Agile development, user research, UX/UI prototyping, technology project management
Tools & Platforms: Figma, VS Code, Salesforce, HubSpot, Microsoft Office Suite

PROFESSIONAL EXPERIENCE

Founder <i>Avalanche Intelligence</i>	March 2026 – Present
- Identified fragmented forecasting, mitigation, route-planning, and staffing workflows that force avalanche mitigation teams to organize across disconnected systems, delaying operational decisions in a time-sensitive mountain resort environment. - Designed and built a centralized web application using React, TypeScript, structured operation data, AI-assisted development, and user-centric product design to support forecasting, route planning, avalanche mitigation, and patrol scheduling optimization. - Developed a functional prototype projected to save 15-30 minutes per patroller per shift, potentially recovering 180-360 staff hours and approximately \$5,000 to \$11,000 in labor costs over a 120-day season for a six-person avalanche team.	
Co-Founding Account Executive (Product Manager) <i>SquarePeg</i>	July 2025 – November 2025
- Co-designed and launched outbound go-to-market strategy, utilizing A/B Testing methods, customer qualification framework, and messaging, driving month-over-month pipeline growth of up to 120% over the first 3 months of the motion. - Prototyped and iterated customer-facing websites using AI-assisted development, synthesizing discovery insights and pricing strategy into user-facing product, increasing website visit rates by 30% in the first month of deployment. - Conducted 30+ structured customer discovery interviews to identify recurring pain points, synthesizing Voice of Customer data into actionable recommendations that directly informed product positioning and sales messaging.	
Account Executive, Global Enterprise Associate Account Executive <i>Verkada Account Executive, Corporate Growth</i>	June 2023 – October 2024
- Led consultative discovery with executive stakeholders, mapping physical security solutions to measurable business outcomes and consistently exceeding quarterly quota (100%, 117%, and 120% attainment). - Analyzed customer feedback across dozens of engagements to identify security inefficiencies and priorities, strengthening solution recommendations and driving a 65% upsell rate among onboarded customers. - Ranked as a top performer among Global Enterprise Associate Account Executives, achieving 300% of quota for qualified leads converted to booked meetings, as 1 of 15 Enterprise Associates promoted from a pool of over 100 Associate Account Executives internationally.	
National Ski Patroller & Emergency Medical Technician <i>Deer Valley Ski Resort (November 2024 – April 2026)</i> <i>Volunteer Ski Patroller Brighton, UT & Mount Snow, VT (June 2015 – Present)</i>	October 2015 – Present
- Delivered emergency medical care and coordinated rescue operations in dynamic alpine environments, making rapid, high-impact decisions that protected guest safety while minimizing operational disruption. - Streamlined incident reporting and cross-team communication between ski patrol, EMS, and mountain operations, reducing response delays and avoiding costly downtime or terrain closures.	

PROJECTS

AcademAI — Learning Compass AI in Education AWS Hackathon
- Developing an AI-powered application that personalizes sixth-grade ratio instruction based on learner preferences, interests, assessment performance, and student feedback through a 15–20-minute adaptive learning cycle. - Building and testing six learner profiles using Python, Streamlit, Amazon Bedrock, structured JSON outputs, transparent rule-based scoring, mathematical validation, explainable recommendations, anonymous data handling, AI guardrails, and fixed fallback content.
